

Job Title: Junior Front-End Developer

Job Summary

We're looking for a passionate Junior Front-End Developer to help build and maintain engaging, user-friendly web applications. You'll work closely with designers and back-end developers to bring digital experiences to life, ensuring responsive design and smooth functionality across devices.

Key Responsibilities

- Convert design mock-ups and wireframes into responsive web pages using HTML, CSS, and JavaScript
- Collaborate with UX/UI designers and back-end developers to implement features
- Optimize applications for maximum speed and scalability
- Debug and fix issues across browsers and devices
- Stay updated with emerging full stack technologies and trends
- Assist in maintaining and updating existing websites and applications
- Ensure technical feasibility of UI/UX designs
- Write clean, maintainable, and efficient code
- Participate in code reviews and team meetings

Required Skills

- Proficiency in HTML5, CSS3, and JavaScript
- Familiarity with CSS frameworks like Bootstrap & Tailwindcss
- Familiarity with front-end frameworks like React/Angular/Vue.js
- Understanding of responsive and mobile-first design principles
- Basic knowledge of version control systems (e.g., Git)
- Backend Technology like PHP, Python is Plus
- Good problem-solving and debugging skills
- Ability to work in a collaborative team environment
- Eagerness to learn and grow in a fast-paced development setting

Qualifications

- Bachelor's degree in Computer Science, Web Development, or related field (or equivalent experience)
